

Reducing the harm caused by alcohol; what can the medical profession do?

Vivienne Nathanson

Director of Professional
Activities, BMA

We see the harm

- Documentation
- Analysis
- Prediction
- Research
- Management/treatment
- Prevention

What are we good at?

- Analysing the evidence
 - Making connections
 - Thinking forward
 - Learning from the past
-
- Playing a long game
 - Being a thorn in the flesh of those with real power

What are the barriers to action

- Lack of joined up government
- Short term views
- Poor leadership
- Fear of leader writers
- Equivocal evidence of what works
- Other “bigger” targets

Do we have evidence of what works

- Yes, increasingly on specific activities and groups
- Yes, in terms of government engagement
- Yes in terms of empowerment

A framework for action

- Joined up government
- Joined up, multi-department action
- Not just the home office
- Co-operation and co-ordination of those interested
- Bring in minority players
- Internationally - FCAC
